

CUTTING BOARD COAT RACK

A Unique way to hang your coats

INGREDIENTS

- Old Wooden Cutting Board
- 4 Coat Hooks
- Your favorite Stencil
- Chalk based or mineral based paint
- Drill
- Stencil brush

PREP TIME

- Prep | 10 m
- Paint | 20 m
- Ready in | 30 m

PROCEDURE

01

Lay wooden cutting board on a flat surface. Lightly wipe off any dust or (old food!?) Make sure surface is smooth.

02

Remove stencil from package and place in the center of cutting board. Open can of paint and lightly dip stencil brush into paint. Begin to make dabbing motions to stencil design.

03

Less paint is always more when stenciling. :) Continue to make dabbing motions until the stencil is completely stenciled on cutting board.

04

Place coat hooks on bottom of cutting board. Begin to drill holes in cutting board to attach hooks. Once hooks are applied, paint hooks. :) You have done an amazing job!
